

Access Windows Desktops & Applications from *Anywhere* using *Any Device!*

WITH ERICOM ACCESSNOW™ — USING JUST A WEB-BROWSER, INSTANTLY TRANSFORM ANY MOBILE DEVICE, TABLET OR PC INTO A SECURE, ENHANCED RDP CLIENT

Empower users with the mobility and flexibility to access Windows desktops and applications hosted on Windows Terminal Services/RDS/VDI/physical workstations — from the widest variety of devices, including Windows PCs, Mac, Linux, iPad/iPhone, Android, Google Chromebook, RIM BlackBerry, Playbook — even locked down workstations!

WHAT IS ACCESSNOW?

Ericom AccessNow is the first pure HTML5 RDP client for accessing hosted Windows applications and desktops. It **runs entirely inside the browser**, using only standard web technologies.

REAL BENEFITS!

- **Lowers IT overhead — dramatically reduces windows PC software management load.**
NO installation of client software or plug-ins (e.g., Java, Flash, Silverlight, ActiveX) is required on the user device.
- **No more device issues.** Uses any HTML5-compatible browser with no client software to install. Turns any device into a secure access point to information and applications.
- **Works with your current browser:** any HTML5-compliant browser, including Chrome, Safari, Internet Explorer, Firefox and others.
- **Great user experience. Looks, works and performs** as well as a native RDP client, especially over the WAN with its own built-in acceleration technologies.
- **Intuitive to use.** Using standard web browsers, users can quickly and easily get access to what they need when they need it... from anywhere.
- **Integrates** with organizational portals and web sites.
- **Secure data.** Because of AccessNow's unique web browser based approach, all your company's sensitive data remains secure with no information left on the user device when the sessions ends.
- **Nothing complicated. Runs out-of-the-box,** without requiring any customization, installation or configuration.
- **Supports BYOD** (Bring Your Own Device) initiatives — Gives users the flexibility to access their working apps and desktops from their own personal device without requiring IT support of the device.
- **Ericom Secure Gateway (Free option).** Enables road warriors or home office workers to securely connect to internal resources from outside the firewall — no VPN is required.
- **Increases deployment flexibility;** also works with locked-down devices.

HOW DOES ACCESSNOW WORK?

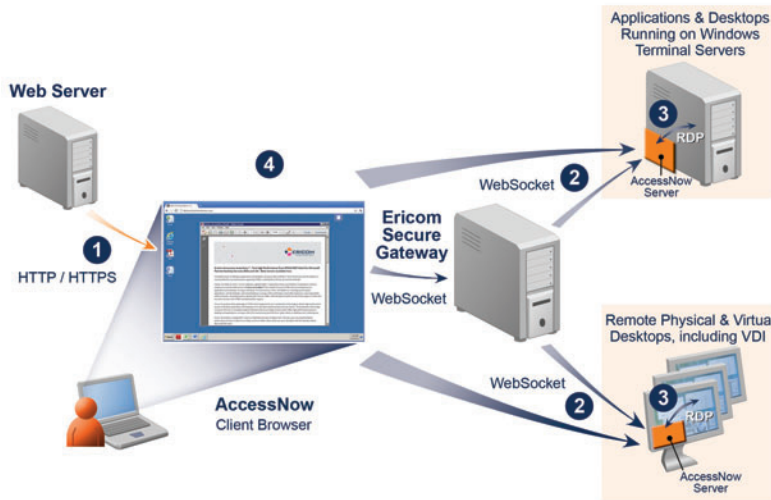

It's so simple! All you need is a Web-browser, and an internet connection.

- Open the web page
- Enter your log-in credentials
- Click 'Connect' — The desktop (or application) appears directly inside the browser window
- That's it.

"AccessNow fits right in with our goal to provide students with a computing experience that closely matches the traditional, full desktop computing experience and is affordable and productive ... We quickly discovered how easy AccessNow is to deploy and use. You simply log in and you have your Windows desktop. It just works."

Tommy Carter, IT Systems Engineer for Richland School District Two

ERICOM ACCESSNOW COMPONENTS

1. End-user navigates to the AccessNow URL to start the connection.
2. Client connects to AccessNow Server using WebSockets — AccessNow Server is usually installed on RDP host itself.
3. AccessNow Server translates WebSocket communication to/from RDP.
4. Remote Windows desktop/application UI is displayed inside the browser window.

NOTE: Optionally, client connects to AccessNow Server through Ericom Secure Gateway
